10.2 CACTUS LAKE Well - Ratepayer Access

DEFINITION:

Ratepayer access and supply of water from the Cactus Lake Well.

POLICY:

The Cactus Lake well is located in the NE 20 36 27 W3, Lot 15-Blk/Par 2-Plan G607 Ext 0 and provides non-potable water for Municipal facilities and the residents of Cactus Lake.

Under certain conditions and limits as per below, Municipal ratepayers are allowed to access water from the well.

If damage to the facility occurs due to the Ratepayer not operating within the framework of the conditions and limits, the Ratepayer shall be liable for the damages.

There is no charge for water.

Conditions and Limitations

- Ratepayers must stay on site while filling their water tank.
- Ratepayers are limited to 500 gallons of water per day.
- No sprayers or units carrying spray or chemical are allowed to fill.
- No commercial units are allowed.

If conditions and limitations are not being honored by Ratepayers, the Municipality will be forced to deny public access to the well.

The Municipality will comply with all standards and recommendations set by the Public Health Authority.

Public Health Inspection Report, March 27, 2014

RATIONALE:

As a water resource and infrastructure is necessary for Municipal facilities and the residents of Cactus Lake, the Municipality has developed and maintains a water well in Cactus Lake.

As long as the present water supply exceeds the quantity of water required by the Municipal facilities and residents of Cactus Lake, local ratepayers are free to access the water supply (at no cost) as a supplemental water source to operate their residential yard sites.

Conditions and limitations have been developed as excessive demands on the well has resulted in reduced water pressure to Municipal facilities and Cactus Lake residents and sand being drawn into water lines.

AUTHORITY:

Public Health Authority, March 27, 2014
